EDUCATION

AkiraChix

codeHive - Diploma in

Information Technology

February 2024- Present

Kisii University

Diploma in Business

Information Technology

2020-2022

SKILLS

- Project Management
- Frontend Web
- UX Research
- UI/UX Design
- Backend Development
- Frontend Mobile

PROJECTS

- Mavazi
- Mentorship Website
- Movie App

PERSONAL STATEMENT

Technology's transformative impact is evident in various aspects of our lives, from the ease of online banking to the ubiquitous of social media. However, this dependence on digital systems also heightens cybersecurity risks, emphasizing the importance of safeguarding personal data. Daisy's fascination with AI-driven security solutions stems from their ability to swiftly detect and counter threats using extensive data analysis. As a software developer, Daisy aims to contribute to cybersecurity advancements, leveraging AI's capabilities to fortify defenses against evolving cyber threats.

SKILLS

- Capable of creating responsive web applications using React.js and HTML/CSS.
- Ability to utilize Django REST framework to design and build RESTful APIs.
- Capable of designing user-friendly and intuitive UI interfaces using Figma.
- Knowledgeable in Scrum and Agile techniques for iterative product development.
- Skilled in dynamically updating web content and handling asynchronous tasks using JavaScript.
- Knowledgeable in defining and analyzing product metrics for data-driven decisions.
- Skilled in applying qualitative and quantitative research methods to drive data-informed decisions.
- Skilled with PostgreSQL and SQL Queries for effective database management and querying.
- Knowledgeable in designing and implementing relational databases.
- Skilled in defining and analyzing product metrics to evaluate product performance.
- Ability to analyze time and space complexity of data structures and algorithms.
- Knowledge in managing the product lifecycle to ensure product success.
